## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 8 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Kondo et al (US 4,950,686).

Kondo discloses the compound, 7-methyltropolone (col. 1, line 32 and col. 11, lines 1-5). The instant claims are drawn to a compound of formula (I) *and isomers* thereof, and as such, the compound disclosed by Kondo et al anticipates the instant claims when any of one of R<sub>1</sub> to R<sub>3</sub> in instant formula (I) is a methyl group and the others are hydrogen.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 1621

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 18-23 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 and 17 of U.S. Patent No. 6,689,342. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims only differ from the above mentioned U.S. Patent claims in the absence of an *express* recitation of at least one essential oil in the oral care composition. However, the "comprising" language found in the instant claims does not exclude the presence of other materials that may have an oral care effect, such as an essential oil. Furthermore, as per applicants' own admission on page 14, lines 1-5 in the instant specification, certain essential oils are known to be effective in delivering therapeutic agents to the oral cavity. Further, the U.S. Patent discloses at column 3, lines 34-39 that the essential oils used in the oral care compositions of the disclosed invention are present to provide antiseptic activity. It therefore would be obvious to a person of ordinary skill to include an essential oil in an oral care

Art Unit: 1621

composition for treating or preventing diseases or conditions of the oral cavity, so as to afford an antiseptic activity to the composition.

Claim 18 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,787,675. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant composition comprises a tropolone compound that is encompassed by the generic formula of the tropolone compound(s) present in the oral care composition disclosed in the U.S. Patent; as such, the composition being claimed herein is *essentially* the same as that which is claimed in the U.S. Patent.

Claims 18-23 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 2-6 of prior U.S. Patent No. 6,787,675. This is a double patenting rejection.

### ***Claim Objections***

Applicant is advised that should claim 8 be found allowable, claim 14 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

Claims 7, 9-13, and 15-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
